

# Annual Trail Survey 2009

## Slippery Elm Park

My department and I have completed our annual trail survey of the trails in Slippery Elm Park. As usual, I am writing my own trail survey assessment instead of filling out the ridiculous survey form that the government asked me to fill out. We have found the trails to be in good condition. That is all that I will share, as I believe that the government does not need further details about the condition of the trails. If anybody needs additional information, they can walk the trails themselves. Please do not reach out to me to discuss this further. End of assessment.
